

## Wireless Broadband Solutions Infrastructure In-Building Wireless/DAS

**We don't just bridge the gap, we help you Crossover.**

Crossover is more than a distribution partner for many of the world's top wireless broadband and in-building wireless/distributed antenna systems(DAS) manufacturers. Crossover is more than an engineering firm, with world class engineers, utilizing powerful software tools like Pathloss and iBwave. **We are your 'Wireless Technology Partner' for solutions that just work.**

Crossover was founded in 2007 by a group of industry veterans, looking to bring a new approach to how wireless solutions are sold and supported in the North American market. Focused on **Best of Class** wireless solutions, Crossover provides skilled design and implementation engineering expertise with every product sold to ensure your network build is a success.

### WHY CHOOSE CROSSOVER:

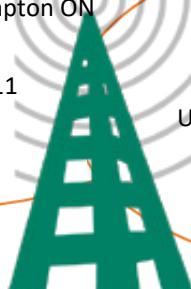

- Specialised Wireless Stocking Distributor
- Veteran Sales & Engineering Team
- Tier 1 Service Providers to VARs & Integrators – *We Got You Covered*
- Complete Solution Provider
- Certification Training
- Pathloss and iBwave Design
- FCC and IC/ISED Licensing Services
- Two Convenient North America Warehouses
- Pre-Deployment Staging and Configuration

#### Crossover Canada

10 Bram Court, Brampton ON  
L6W 3R6  
(866) 616-5111

#### Crossover USA

10 Millpond Drive  
Unit # 2 & 3 Lafayette NJ 07848  
(855) 471-7823

## Wireless Broadband Solutions

Point-to-Point, Point-to-Multipoint, fixed or mobile, licensed or unlicensed?

Microwave / Small Cell backhaul, LTE (Public or Private) or Outdoor Wi-Fi, Crossover has solutions that deliver the data and voice transmission you need, to places you want, without the headache of copper or fiber lines.

## In-Building Wireless/DAS/Small Cells

Cellular/LTE, Wi-Fi and First Responder/Public Safety Networks serve a critical need in today's enterprises, public spaces, office towers and hospitals. Outdoor macro networks often don't penetrate these facilities well enough to provide reliable communications inside.

Crossover offers a wide range of solutions to fit all building sizes, requirements and budgets including fiber DAS, Small Cell and passive off-air repeater solutions.

## Infrastructure

A network is more than radios. Quality Cable, Antennas (Small Cell, Macro, Microwave), Power Solutions, and Steel Products are the foundation a wireless network or DAS system is built on.
